

ALBERTA SPOUSAL SUPPORT | WORKSHEET 2 OF 3

Spousal Support Income and SSAG Input Sheet

Records the proposed incomes, adjustments, formula assumptions and low-to-high SSAG output in one reproducible worksheet.

BEST USED
WHEN

Use this before running or comparing spousal-support calculations.

ALBERTA LEGAL CHECKPOINT

The Spousal Support Advisory Guidelines are advisory and address amount and duration only after entitlement has been established. The result depends on reliable income, the correct formula, the relationship history and any applicable exception, review or variation issue.

Primary source: [Justice Canada: Spousal Support Advisory Guidelines](#)

PREPARED FOR

DATE

1 Complete what you know

2 Mark gaps and assumptions

3 Attach supporting records

THE PRACTICE LENS

A precise range can conceal uncertain inputs. We keep salary, bonuses, corporate benefits, retained earnings, pensions and other adjustments visible beside the source document so the parties can see whether they disagree about law, evidence or arithmetic.

A CONCRETE EXAMPLE

A payor has a \$120,000 salary, a \$35,000 bonus and a private company that paid \$18,000 of vehicle and travel costs. The useful question is not whether to enter \$120,000 or \$173,000 by instinct. It is which components are recurring, personal, available and supported by the records.

Income inputs

Use one row per issue and identify the source for every important number or date.

Income item	Recipient	Payor	Source or adjustment
Employment income			
Bonus or commission			
Self-employment			
Dividends or benefits			
Pension or benefits			
Trust or investment income			
Proposed guideline income			

Formula assumptions

Tick completed items. Circle anything that needs a document, follow-up or legal advice.

- ☐ Entitlement has been assessed separately.
- ☐ Relationship length and ages at separation are correct.
- ☐ Dependent children and child support are entered correctly.
- ☐ Tax, benefit and parenting inputs are current.
- ☐ Any prior support period is identified.
- ☐ A possible SSAG exception is flagged for advice.

Calculation record

Use one row per issue and identify the source for every important number or date.

Output	Low	Mid	High
Monthly amount			
Annual amount			
Duration			
After-tax cash flow			
Alternative inputs tested			

BRING THIS TO YOUR CONSULTATION

You do not need every blank filled. Mark the three items that matter most, attach the records you relied on and use this handoff to identify the next decision.

STATUS	☐ Ready to discuss ☐ Missing records ☐ Deadline or urgent issue
